

Short introduction

PRO-4-PRO.com is the online platform of GIT PUBLISHING for your online advertising. It is an ideal addition to the other advertising possibilities of GIT PUBLISHING. PRO-4-PRO's clear structure as well as its cross-sectoral / interdisciplinary classification guarantees an optimal placement/presentation and easy identification of your enterprise and your products. Our PRO-4-PRO.com service is mainly used by managing directors, technical designers, developers, scientific specialists and buyers, in order to research information on product novelties. Comfortable search functions deliver fast and effective search results. Monthly newsletters for selected interest areas continuously inform about newest industry product innovations to the users. Interactive fair specials, a meeting calendar, and since 2008 a newsboard are some further components of PRO-4-PRO.com which round off the portfolio.

Bosch Video Management Systems:
A unique video security solution across any IP network

- Scalable management of video, audio and stills over IP
- Scalable solution a first for this sector
- Flexible installation and maintenance costs

Bosch is introducing a unique enterprise IP video security solution that provides centralized management of digital video, audio and stills across any IP network. Designed to work with Bosch security products as part of a total video security solution, the Bosch Video Management System (BVMS) allows customers to integrate their existing investments into one, central storage solution. Because it enables live and recorded video images of any size to be viewed at any time, from any location, the Bosch VMS provides complete management and control of all installed IP. It is also capable, with its powerful flexibility of scaling and its expanding security system as needed. The Bosch VMS is suitable for a wide range of security applications, including government, sports arenas, airports, ports, IT & IT, and university campuses.
